

Your Hurricane Season Plan

The Atlantic hurricane season runs from June 1 to November 30. The owners who sleep best through it are the ones who decided everything in May. Fill this in with the person caring for your home, and keep a copy where you can find it from anywhere.

DECIDE BEFORE JUNE 1

- ☐ Who readies the house, and how to reach you and a backup contact
- ☐ What comes inside: furniture, planters, grills, decorations
- ☐ Which shutters or impact openings are closed, and which are installed by a licensed provider
- ☐ Refrigerator, freezer, water and air-conditioning settings during a storm
- ☐ Where vehicles, boats and golf carts should be
- ☐ Your insurance agent's number and your policy number, and your community association contact

BEFORE THE SEASON

- ☐ Have shutters and any generator serviced by licensed providers
- ☐ Photograph each room and the exterior, so you have a record of the house before any storm
- ☐ Keep important documents and valuables somewhere you can reach them from away

WHEN A STORM IS FORECAST

- ☐ Confirm the plan with the person caring for your home
- ☐ Outdoor items in and shutters closed, as agreed
- ☐ Photographs of the house before the weather arrives

AFTER IT PASSES

- ☐ A visit as soon as it is safe and the roads are open
- ☐ Photographs of every room and the exterior, shared with you
- ☐ Licensed firms for any repairs, drying or tree work
- ☐ Your agent told promptly, with the photographs, if there is damage
